

A photograph showing a rocky, eroded ground surface. A red and white measuring pole is placed vertically in the center, with a wooden stick leaning against it to the right for scale. The ground is covered with dark, angular rocks and some dry vegetation. The text "H = 80 cm" is overlaid on the image, indicating the height of the pole. Below this, the text "Zone de plus fort ravinement" and "écoulement des eaux" is overlaid, describing the area as a zone of intense erosion and water flow.

H = 80 cm

**Zone de plus fort ravinement
écoulement des eaux**
