

Description du projet

- Captage
- Usine
- Conduite forcée

SCAN 25 Touristique

Aucune légende n'est disponible pour cette donnée.

The map illustrates a proposed water management project in the Montmin area. Key features include:

- Captage (Capture):** Indicated by blue squares, showing points where water is collected from the ground or surface.
- Usine (Factory/Plant):** Indicated by orange squares, showing locations where water is processed or stored.
- Conduite forcée (Forced Conduit):** Indicated by a red line, showing the path of water being transported under pressure.
- SCAN 25 Touristique:** A topographic map scale of 1:25,000.
- Aucune légende n'est disponible pour cette donnée.** (No legend is available for this data).

The map shows the project's route through the Montmin area, starting from the north and heading south towards the Perrière and Forclaz. The route passes through several villages and valleys, including le Bois, la Côte, Montmin, la Perrière, and la Forclaz. The map also shows the location of the Pointe de la Beccaz and the Pointe de la Rochette. The project's path is marked by a pink line, with blue squares indicating capture points and orange squares indicating processing points. A red line shows the forced water conduit. The map includes a scale bar at the bottom left, indicating distances up to 500 meters.
